

**Jaroslav Flegr: SARS-CoV-2 virus comes from the laboratory.  
It's not talked about because scientists are "holding back".**

*(More than two years ago, on the coronavirus boom, he said our target should be a worthy and good virus. And then he painted various black scenarios. What is the SARS-CoV-2 virus doing now, and what's in store for us in the fall? Will it be very risky not to get vaccinated at all after the holidays? And what might the advent of a super-virus look like that will have an infinitely more tragic effect on humanity as a whole? The guest of moderator Barbara Tachecí is evolutionary biologist Jaroslav Flegr.)*

**Personality Plus (<https://rozhl.as/OsobnostFlegr>),  
programme by Barbara Tachecí on the Czech Radio Plus**

*Evolutionary biologist Flegr says,  
"If HIV had come just 20 years earlier, it could have wiped out all of humanity."*

**How Prof. Flegr betrayed them all**

*Look at that heaven's fruits,  
the scientists are in cahoots.  
I guess the information was delayed  
that covid was artificially created.*

*I'm staring at it like a beggar -  
that's what we heard from the famous Flegr.  
Who others are they in cahoots with?  
What else are they playing loots with?*

*With everything that suits them!  
This is where their power roots them.  
And those ill-educated? Science 'shoots' them.*

*The Greedy with the Vain,  
the Gain with the Brain,  
they lie to us all the time and again.*

*(This sonnet was written by Tomáš Očadlík  
just after listening to the above interview on 16 June 2022)*
